

Colloidal Silver

Is one of the most powerful, natural antibiotics known to man. It has been used for thousands of years and has more than 1350 documented uses. Ancient Greeks noticed that families who ate from silver utensils, cups, and plates were rarely sick. The silver was worn off and mixed into their food.

Most antibiotics kill only six or seven different disease organisms, but silver is known to kill some 650-almost 100 times more. There are no known microbes that colloidal silver cannot kill in 6 minutes or less. According to the Colloidal Silver product information guide. It is the only product that kills ALL types of viruses, fungi, bacteria and parasites.

We get silver and other minerals from the food we eat, in organically grown plants. If the food is treated with chemicals and grown in sub standard soil our pets and us are not getting this and other important minerals. This negatively affects our immune systems.

How does it work??

It disables or suffocates a germ's oxygen metabolizing enzymes (or chemical lung) common to all viruses, fungi and bacteria.

Healing Crisis

Can occur when healing happens too quickly e.g. the body's five eliminatory systems (kidney, liver, skin, bowel and lungs) become temporarily overloaded. It is recommended to continue the CS, drink lots of water and add some vitamin C.

On average it takes four days for the initial benefit of Colloidal silver to begin.

It has been tested at UCLA medical labs where it has killed every virus on which it was tested.

Colloidal Silver's many uses:

-Can is used topically for cuts, burns, wounds, warts and hotspots (it does not burn or sting) and internally for dermatitis (inflammation of the skin).

-It regenerates damaged cells and tissue, helps prevent infections (viruses, bacteria, and fungi) including bladder and urinary tract infections, yeast infections and canine parvovirus.

-A parasite's eggs cannot hatch if there is sufficient CS in the surrounding tissue. They are killed with in 6 minuets and then eliminated by the immune system.

-Helpful for ringworm and other fungus.

-Prevents plaque from forming on the teeth, neutralizes tooth decay and bad breath.

-Can be used for eye problems/infections (can safely go in the eye).

-Sterilizes water e.g. for camping, helps preserve food.

-Ear infections, reduces inflammation and accelerates healing.

-Can is used like grapefruit seed extract to clean; it acts as a natural disinfectant.

-It destroys dust mites and bacteria when sprayed on mattresses, bedding, furniture and carpeting.

-It can be added to raw food if people are concerned about the bacteria in raw meat.

*Colloidal Silver has NO known side effects, is non-toxic, odorless, and tasteless, and is safe for pregnant and nursing moms. There are no adverse interactions with medicines or herbs.
